SKILLS

- C++, Java, Python, Swift
- HTML, (S)CSS, JS
- MongoDB, Express, ReactJS, Node.js
- Git, Terminal, VS Code, Open Source

EDUCATION

Graduating 05/2022 **Bachelor of Arts** | *CUNY – Hunter College, New York, NY*

- Computer Science
- Algorithms, Data Structures & Software Engineering

WORKS

- 03/2021 – 05/2021 **myDay (Web App)** | *MongoDB, Firebase, Express, ReactJS*
- A productivity dashboard which allows users to add tasks and post their thoughts and ideas on a digital journal.
 - It allows users to sign in to save their tasks and journal posts on the database.
 - The users can edit or delete their journal posts and make any changes to their account if needed.
- 07/2020 – 08/2020 **CoViz-19 (Web App)** | *MongoDB, Express, ReactJS, Node.js*
- A dashboard with all the current Covid-19 updates which lets users visualize and interact with the data through tables and graphs.
 - It allows users to post their thoughts about anything.
- 12/2019 – 01/2020 **habit-app (iOS)** | *Swift, Core Data*
- It tracks users progress to make a new habit.
 - Allows users to add new habit trackers or delete the existing ones from the list and saves the data locally.

EXPERIENCE

- 12/2020 – 05/2021 **Quality Assurance Intern** | *Videri Inc., Remote (NY)*
- Wrote automated test scripts for 10+ products to make sure they pass all the requirements before deployment.
 - Manually tested more than 7 products for performance issues then propose solutions to the team when needed.
 - Remotely worked with 12+ clients to solve their issues and answer any technical questions they have.
 - Worked with multiple teams to make sure the product is safe, secure and ready to be used in real world.
