Education

CUNY – Hunter College
Aug 2018 - May 2022

BA in Computer Science

• Courses: Algorithms, Data Structures, Databases, Operating Systems, Data Science, Artificial Intelligence

Skills

Languages	C++, Python, Java, JavaScript, Swift
Technologies	MongoDB, Express, ReactJS, Node.js, AWS, PostgreSQL, Docker, Git

Experience

Pantsuit Professionals
New York, NY

iOS App Dev Intern
Jun 2021 – Aug 2021

• Implemented a Search functionality with features like auto-complete, suggestions, and filtering.
• Worked with the Backend team to display the correct data in different screen sizes.
• Added various animations between UI Views for smooth transition and overall better user experience.
• Collaborated with other developers to identify and alleviate number of bugs and errors in software.

VIDERI Inc.
New York, NY

Quality Assurance Intern
Dec 2020 – May 2021

• Wrote automated Selenium WebDriver tests for Chrome in JavaScript with 100% accuracy.
• Tested 8+ pre or post-production products using various techniques to find and report any bugs.
• Reported bugs to the development team and assisted in coming up with an efficient solution.
• Actively conducted code reviews to ensure the overall code base is efficient and bug free.

Projects

myDay
Apr 2021 – May 2021

Full-Stack Web App | *MongoDB, Express, ReactJS, Node.js, Firebase, Firestore*

• It is a productivity dashboard that allows users to save their tasks and post their thoughts and ideas in a digital journal. The users can sign in to store their data in a database. It also allows them to edit or delete an existing post and make any changes to their account if needed.

CoViz-19
Jul 2020 – Aug 2020

MERN-Stack Web App | *MongoDB, Express, ReactJS, Node.js*

• This web app was built during CodeLabs Summer 2020 internship organized by CodeDay. It visualizes the Covid-19 data using graphs and tables to simplify it for the user. It also allows users to post their thoughts and concerns regarding everything that's been going on.
